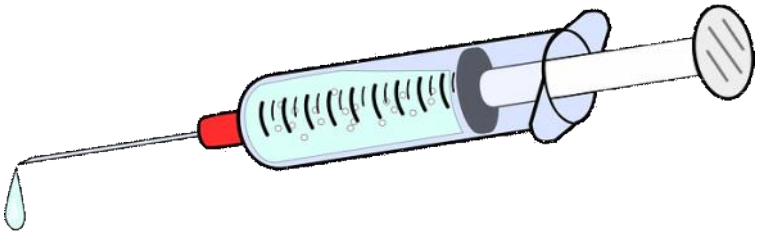
SPOOKY MALISCIOUS BAD NEWS 4 THS TECH

A Trusted Hosting provider ...did What?

by
(deva mars) 10-22-2922



🎬

In the competitive cut-throat world of 'Cloud & VPN 'Hosting
rivalry, the Big BLUE did not PROTECT!
Industry MOGUL the #1 " Bluehost" Professional
fell short on many levels.

The WEBSITE HOSTING DISASTER

What is a distributed denial-of-service (DDoS) attack?
https://www.cloudflare.com › learning › what-is-a-ddos...
A distributed denial-of-service (**DDoS**) **attack** is a malicious attempt to disrupt the normal traffic of a targeted server, service or network by overwhelming …
(Cloudflare)

An un-for seen DDOS Attack,
The Client was frustrated & refused to upgrade $275 /per website .
"This was no accident" . The unsettling factor is how strategic they went about their business
"Remote" take down of MY SQL db's
Loss & theft of all Graphic & Intellectual properties & Assets.
20K + of missing Images.

From Hotlinks to 'Code' injection this heartbroken Designer did not GIVE up

& did not let $$$ signs &
threats destroy her Visionary " Non-Profit" Web project.The " Company "
Was and is unaware this this private independent researcher, ..(me myself, & I" works *with* " Google, Microsoft, * Samsung, & Apple Beta testing their Products & Services.

LINUX SERVERS thru shared hosing got " INFECTED". & they

were to be migrated to a better server"… supposedly ".
Tampering with File Structures.
.
All of these things got eventually "discovered".. within a week of when the 1st site went down. From screenshots, to databases, to Cpanel access breaches.. "back In Early September of 2022.
, that I It May not have been apparent "Design & management for the small Web project."
Was all ran by me"

With 35+yrs pro Graphic Design, exp comes a lot of RESPONSIBILTY

Speaking to you now
"designing these sites using a builder & some block editing, does not compare with traditional Website design…" ..
"I'm not a coder' but had to learn enough to be able to navigate through
PHP, Html, JS, CSS, SQL Blog style Landing pages for over 25 Websites

This style of correspondence & neglect, for lack of a better term had kept Me very uncomfortable.
The TRUST WAS IMMEDIATELY withdrawn

" I don't have a Name or a Face but I have an amazing experience through a horrible situation, that I can only learn and grow from .
Now I know NOW
…what NOT to do.
To protect your prescious WORK
WITH all of your heart & soul
Fight 4 WHATS Yours

That is definitely what I have learned. Protect & Care. Security PROTECTION.
TRUST IS EVERYTHING
🎬

I see that the A record of your domain is pointing to 66.235.200.147 according to https://dnschecker.org/#A/organicdevelopers.net Your cPanel IP is 162.241.24.86. The domain's A record should be pointed to 162.241.24.86. May I make the change?We can disable the two facto authentication simultaneously if you'd like.

From <https://helpchat.bluehost.com/>

11:48 pmSI have updated the A record of your domain to 162.241.24.86. However, it will take 0-8 up to 48 hours to be completely updated. If you don't mind, can you please check your website after 48 hours and let us know?11:49 pmDIm also not able to login to that site via Wp-admin, can you

The scan has been initiated in the background. You will see a file named 'scanreport.txt' in the home directory of the File Manager in the cPanel. Please do not take any action unless the scan has completed. The 'scanreport.txt' will have the Scan Summary. after the scan has been completed. If you do not see the 'Scan Summary' in the scanreport.txt, this means that the scan has not been completed. After you see the 'Scan Summary', the scanreport.txt will have a list of all the infected files. Please remove those infected files.
